

# CURVE TABLE

## HOW TO USE CURVE TABLE

Table 1 contains lengths and distances for a curve. The use of this table should be in accordance with the instructions given in the introduction to the book. Table 1 is for curves of 1000 feet length. The use of this table should be in accordance with the instructions given in the introduction to the book. Table 1 is for curves of 1000 feet length. The use of this table should be in accordance with the instructions given in the introduction to the book.

### EXAMPLE

Let in Table 1, for  $20^\circ = 1000$   
 $1000 \times 1.107 = 1107$

Corrected for a  $20^\circ$  for a  $10^\circ$  curve  
 $1107 \times 1.107 = 1225$  corrected length

(Corrected length is 1225 feet)

Central Angle	Length of Curve	Distance from P.C. to P.T.	Distance from P.C. to P.T.
$20^\circ$	1000	520	520
$40^\circ$	1000	420	580
$60^\circ$	1000	320	680
$80^\circ$	1000	220	780
$100^\circ$	1000	120	880
$120^\circ$	1000	20	980
$140^\circ$	1000	0	1080
$160^\circ$	1000	0	1180
$180^\circ$	1000	0	1280
