

Preliminary Survey -

Transit at cedar post marking
S.W. cor. sec 20 - with a variation
of $17^{\circ}12'$ I run on a true East
line 8^{62} ch - and set hub - A

Then transit at this hub -
B.S. to corner post, I turn 90° R + north
and set hub "B" 8^{36} ch -

Then transit at B - B.S. to A
I produce A-B. to C and set
hub 5 ch north of B -

I find measurements to
fences and angles of same
as shown -

Apr 11th 92 -

I set up at monument Cor 17th +
Washington and turned 90° ^{west} from line
of monuments - and ran Transit
line to intersect line A-C in
order to get connect these
lines of yesterday with known
N+S line - (over)
