

Standard Alignment - Sept 2^d

21st Street - (Check of work in
Page 28 + 29)

Formit and sight as before - I find
proper line of 21st Street to
cut 0.45 and .155 south of ticks
set at Van Buren & Jackson
respectively

And at 23rd St proper center
line cuts .07 and .01 south
of ticks previously set at
Van Buren & Jackson respectively

And at 22nd St proper center line
cuts 0.06 and 0.06 south
of ticks previously set at
Van B & Jackson

Note: As this alignment was
made under much more
favorable circumstances and
conditions than the previous
work - I have much more
confidence in it
C. H. N.
