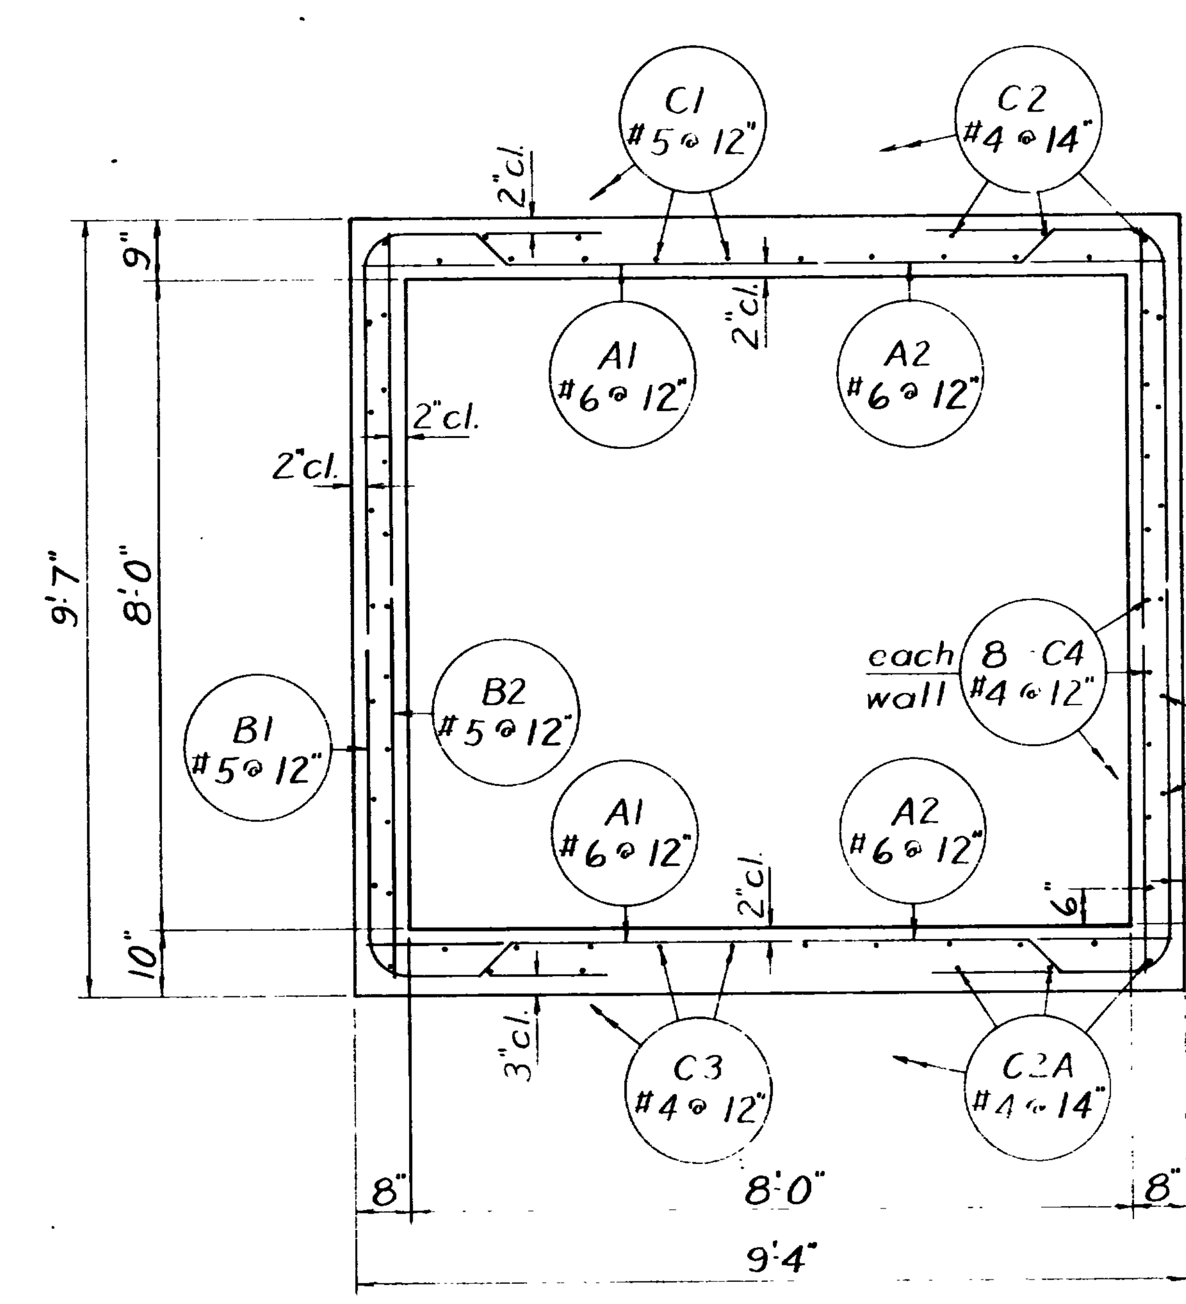
SECTION G-G



SECTION THRU BOX

GENERAL NOTES

Materials, construction, and workmanship shall be in accordance with the Utah Department of Highways Standard Specifications for Road and Bridge Construction, Interim Issue, March 1968 and supplements thereto which are in effect at the date of request for bids.

All reinforcing bars shall be intermediate grade billet steel conforming to A.A.S.H.O. designation M-31. Deformations shall conform to A.A.S.H.O. designation M-137.

All structural steel shall be structural carbon steel conforming to A.A.S.H.O. designation M-183 (A.S.T.M. A-36).

Type II cement (low alkali) required.

DESIGN DATA

The design is in accordance with the A.A.S.H.O. Specifications of 1965.

Loading: HS20-44 or Interstate Alternate
fc = 1200 p.s.i.
fs = 20,000 p.s.i. (reinforcing and structural steel)
n = 10

DESIGN DATA

Live load: H15 + Impact in accordance with the A.A.S.H.O. Specifications of 1957.

fc = 1200 psi.; fs = 20,000.; fs = 18,000 psi (for Struct. Steel), n = 10

GENERAL NOTES

Materials, construction and workmanship shall be in accordance with the State Standard Specifications for Road and Bridge Construction, 1960 edition, and supplements thereto which are in effect at the date of request for bids.

All reinforcing steel shall be intermediate grade Standard A-305 reinforcing bars. All dimensions relating to reinforcing steel are to centers of bars. All reinforcing bars shall be #5 spaced at 12" O.C. unless otherwise specified.

Type II cement required.

For Type "A" Structures, pipe will enter at sides as shown on drawing. For Type "B" Structures, pipe will enter at ends.

Gratings and Bearing Angles will be paid for as Structural Steel.

Wall thickness "T" shall be 6" minimun.

A unit shall include Catch Basin, Bearing Angles and Grating complete.

Quantities shown are for one Catch Basin only. When more than one Unit is required the quantities are to be multiplied by the No. of Units required to obtain the total quantities.

Excavation for Structures does not include Excavation for pipe.

Concrete Class "A"

GENERAL NOTES

Materials, construction and workmanship shall be in accordance with the State Standard Specifications for Road and Bridge Construction, 1960 edition and supplements thereto which are in effect at date of request for bids.

All reinforcing steel shall be intermediate grade Standard A-305 reinforcing bars.

Unless otherwise shown, all dimensions are Out to Out of bar. All reinforcing steel shall be #5 bars spaced 12" on centers. Type II cement required.(Low Alkali.) Concrete Class "A".

DESIGN DATA

H15-44 Loading in accordance with the A.A.S.H.O. Specifications of 1957.
Structural Steel f_s = 18,000 p.s.i. Reinforcing Steel f_s = 20,000 p.s.i.
Concrete f_c = 1200 p.s.i. n = 10

Payment for furnishing and placing Cover Plate and Frame will be paid for as Structural Steel.

All Structural Steel shall receive one shop coat of Red Paint A.A.S.H.O. Designation M 71-42 or M 72-51; also two field coats of Aluminum Paint A.A.S.H.O. Designation M 69-52.

A Unit shall include one Cast Iron Cover and Frame, [illegible] Cleanout Box complete.

Quantities shown are for one Cleanout Box only. When more than one Unit is required the Quantities are to be multiplied by the number of Units required to obtain the total Quantities.

Excavation for Structures does not include Excavation for Pipe.

Ductile iron will be accepted for either the Cover or Frame Fabrication.

DETAIL OF GRATING
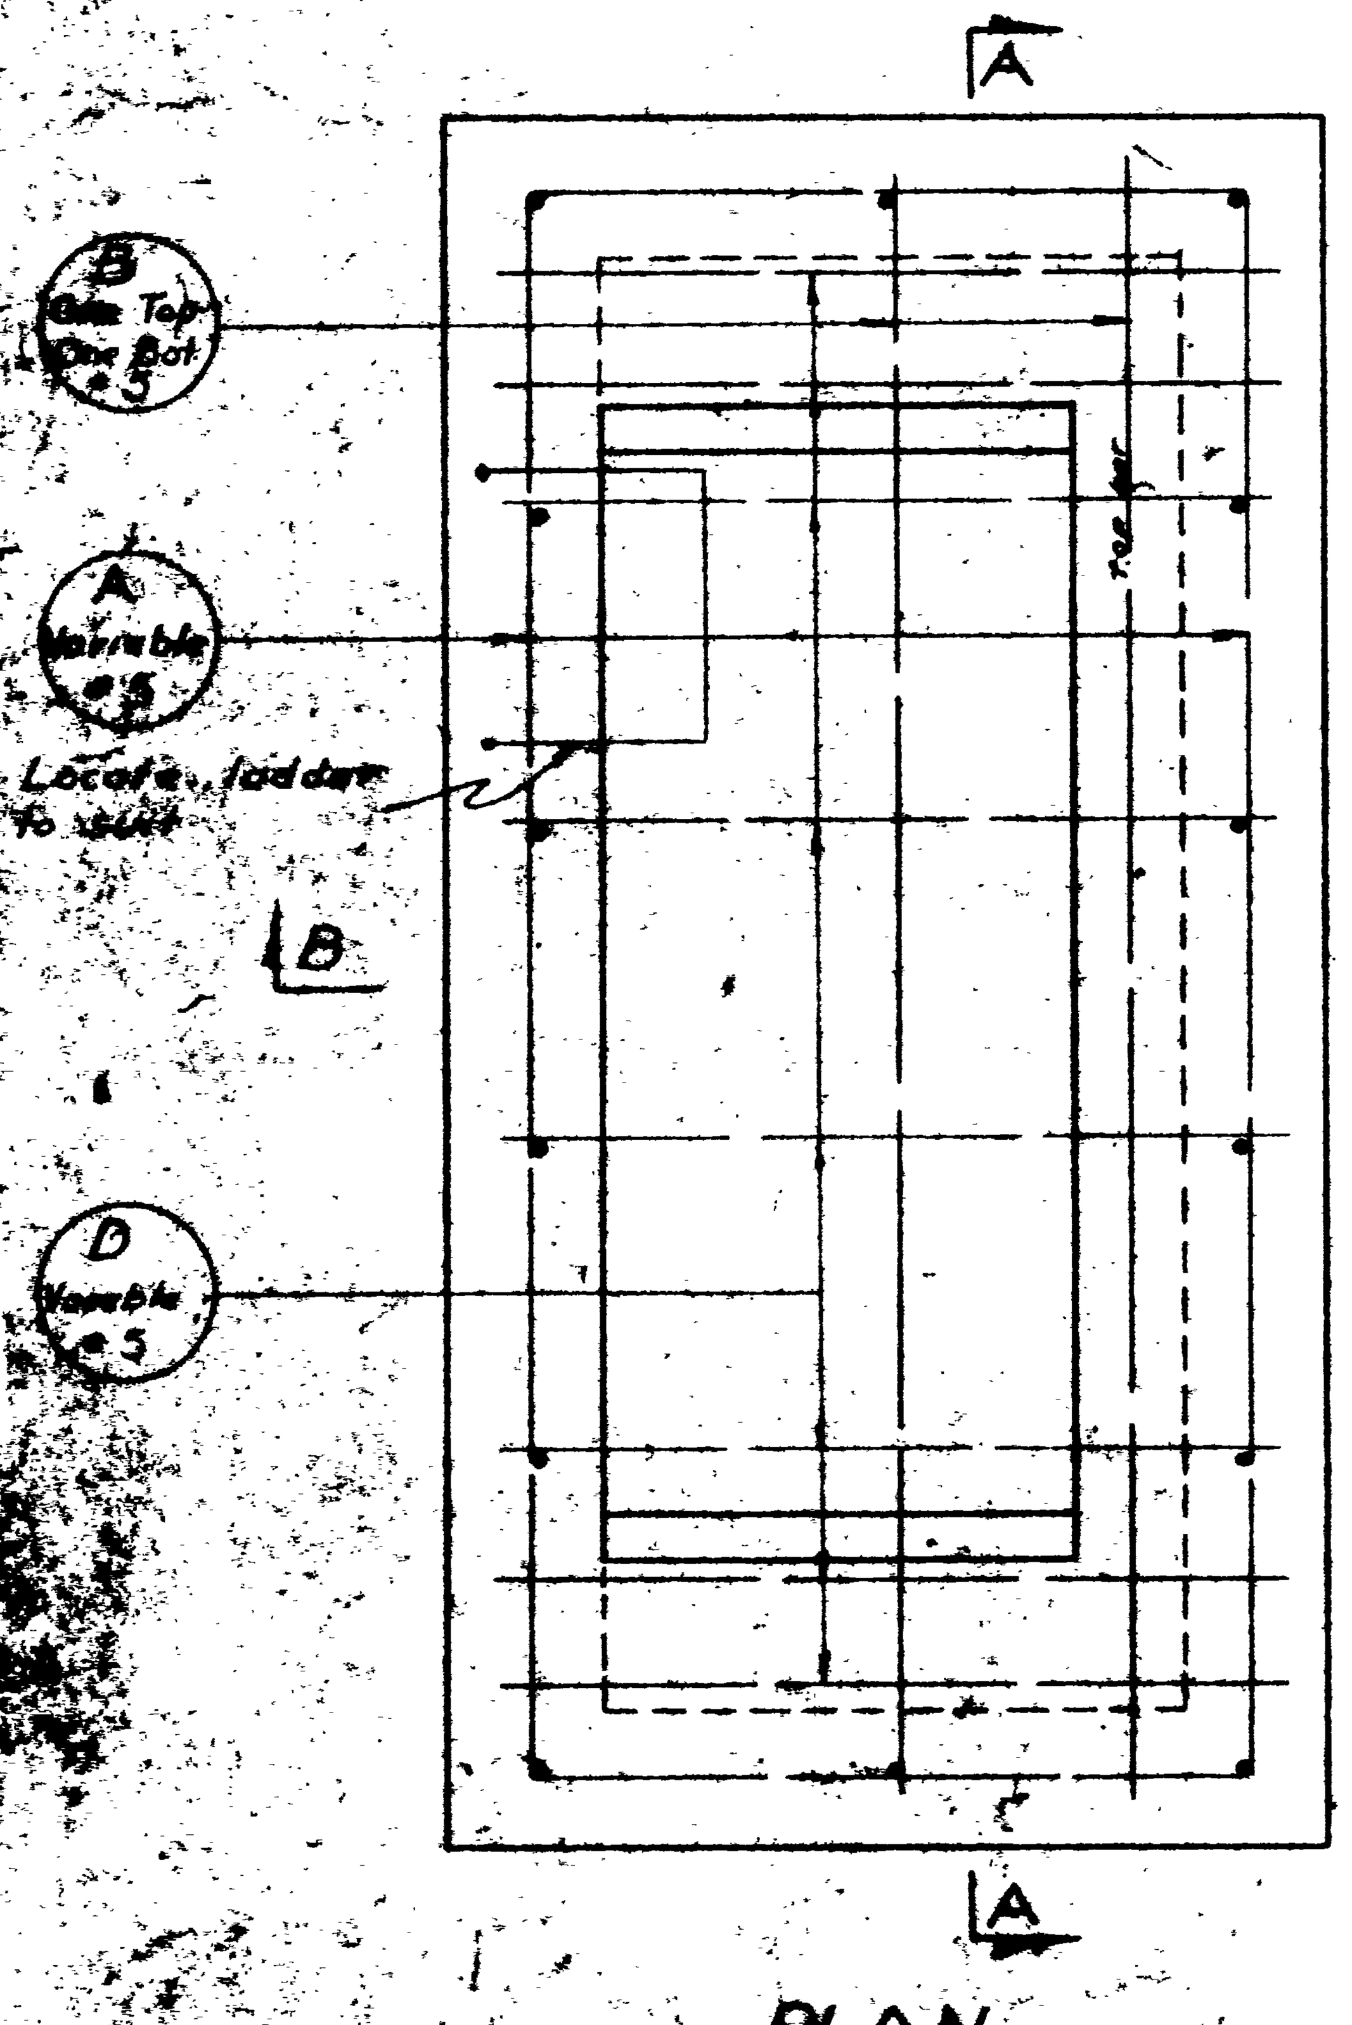
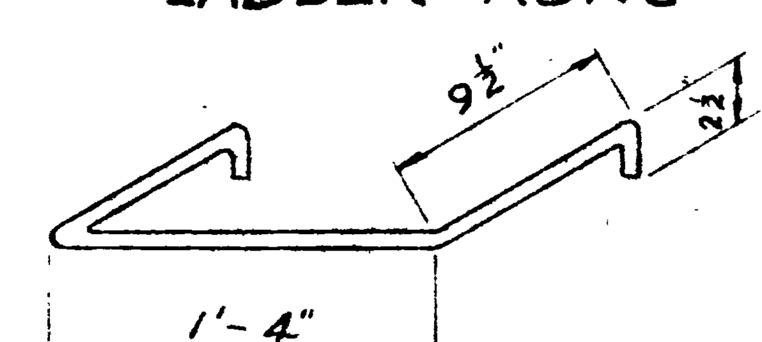
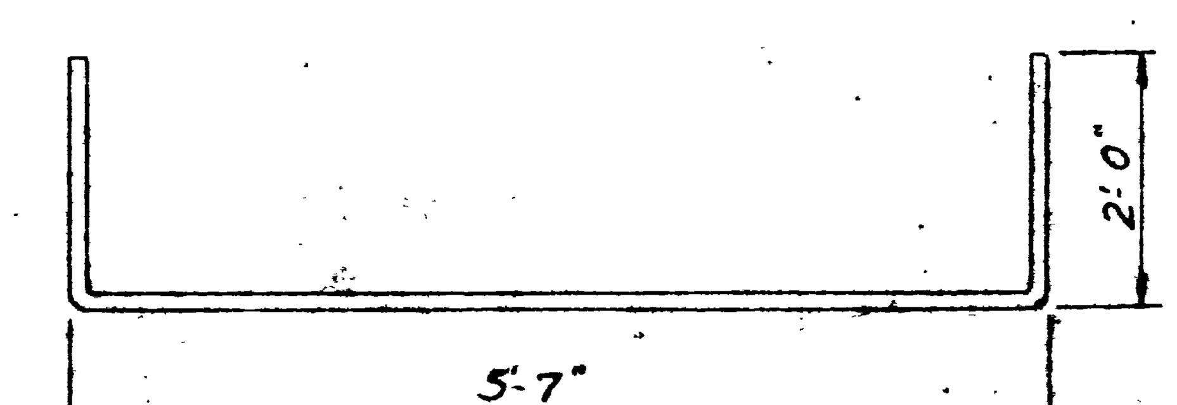
(Structural Steel)
1-Required per Catch Basin
Weight (complete with Bearing ∠s) 310 Lbs.
Weld all Joints





DETAIL OF LADDER RUNG

"E" BAR - #6
Weight each - 5 Lbs.



DETAIL OF "A" BAR

"A" BAR - #5
Weight each - 10 Lbs.

Note: See "List of Structures" for Type of Unit, Size and Kind of Pipe, Stations and Units required.

DESIGN DATA

Live load H15 + Impact in accordance with the A.A.S.H.O. Specifications of 1957.
fc - 1200 psi; fs - 20,000.; fs - 18,000 psi (for Struct. Steel), n = 10

GENERAL NOTES

Materials construction and workmanship shall be in accordance with the State Standard Specifications for Road and Bridge Construction 1960 edition, and supplemental [illegible] to which are in effect at the date of request [illegible].

All reinforcing steel shall be intermediate [illegible] A-305 reinforcing bars. All dimensions relating [illegible] steel are to centers of bars. All reinforcing bars shall be #5 spaced at 12" O.C. unless otherwise specified.

Type II cement required.

For Type "A" Structures pipe will enter at sides [illegible] on drawing. For Type "B" Structures, pipe will [illegible] ends.

Gratings and Bearing Angles will be paid for [illegible] Structural Steel.

Wall thickness "T" shall be 6" minimum.

A unit shall include Catch Basin, Bearing Angles and Grating complete.

Quantities shown are for one Catch Basin only. When more than one Unit is required the quantities given [illegible] be multiplied by the No. of Units required to obtain the total quantities.

Excavation for Structures does not include Excavation for pipe.

Concrete Class "A"

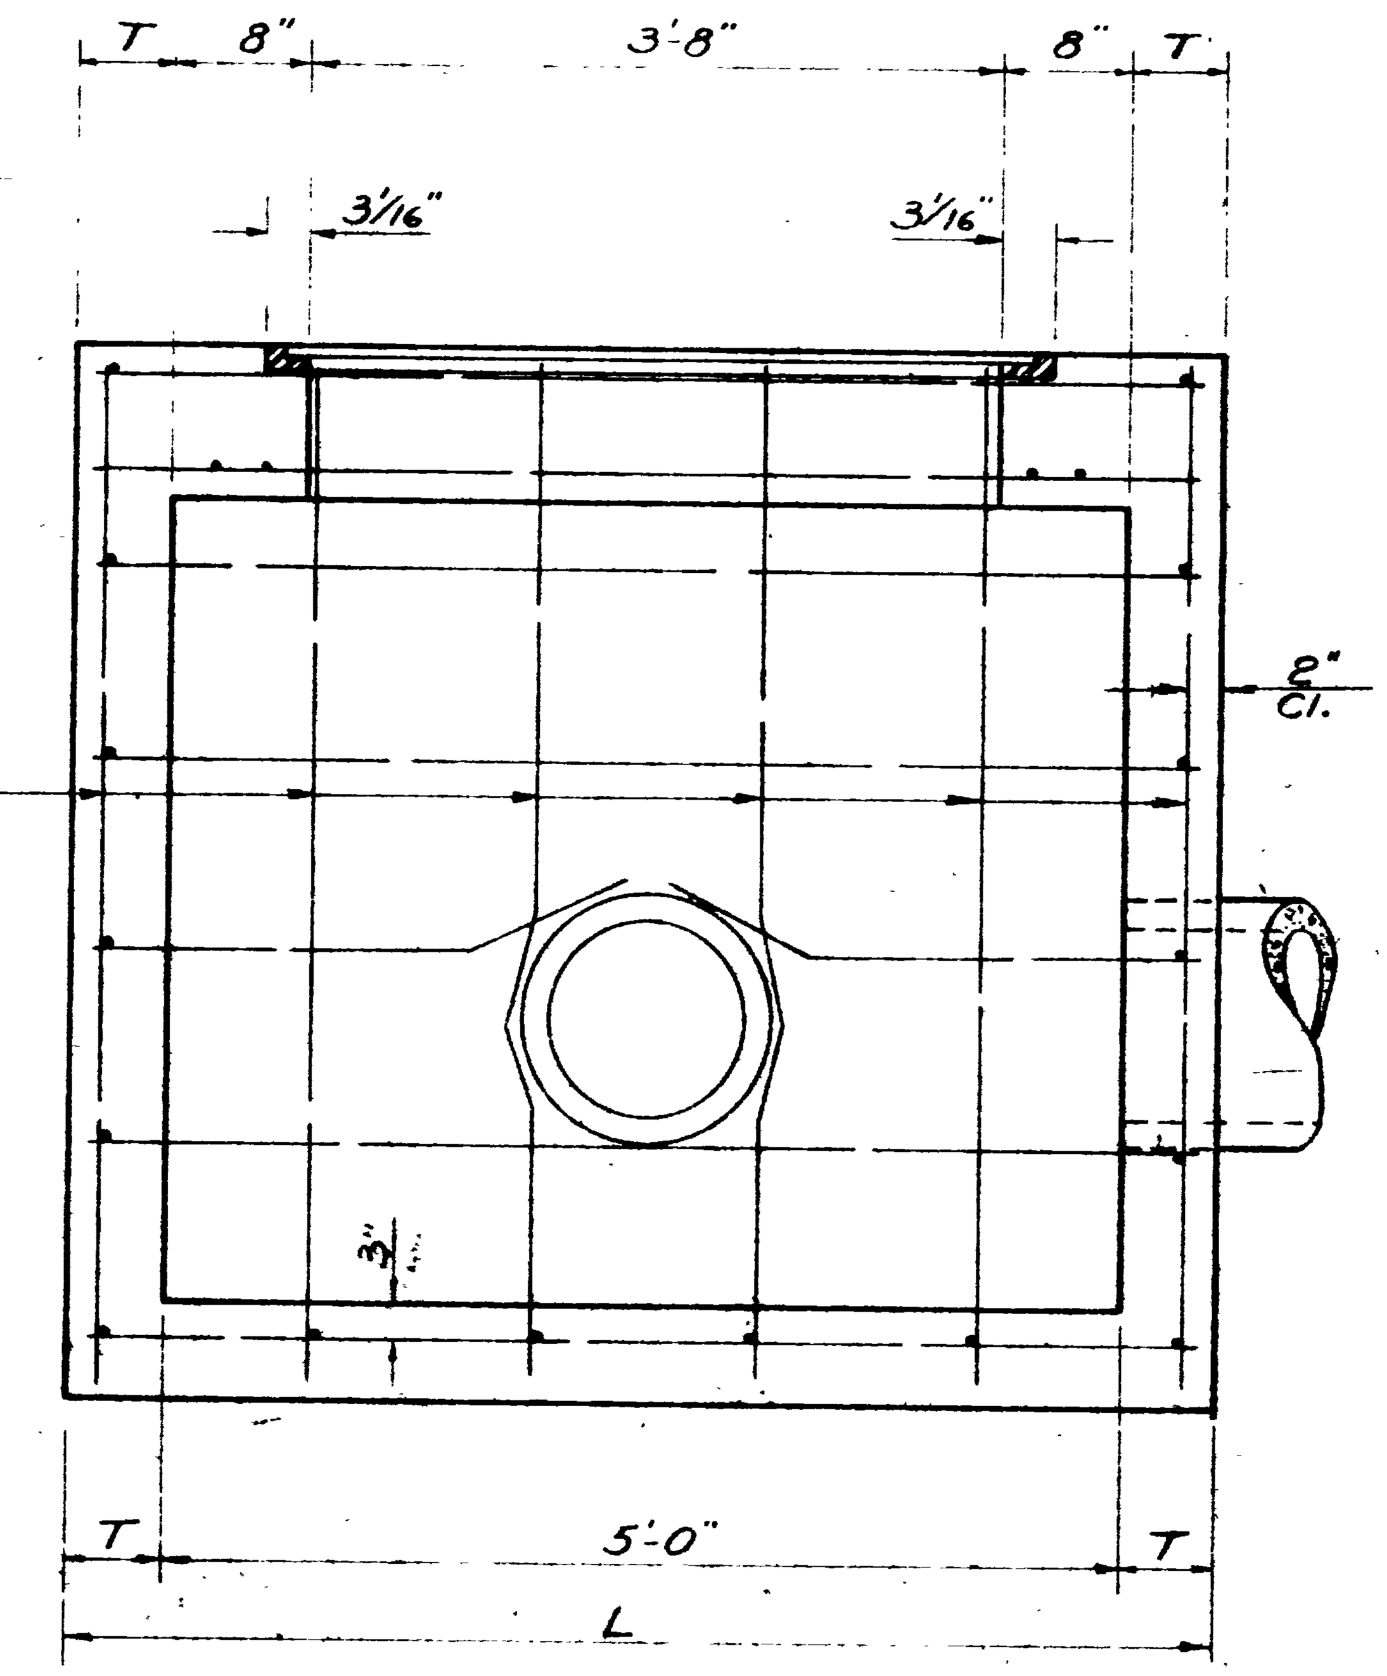
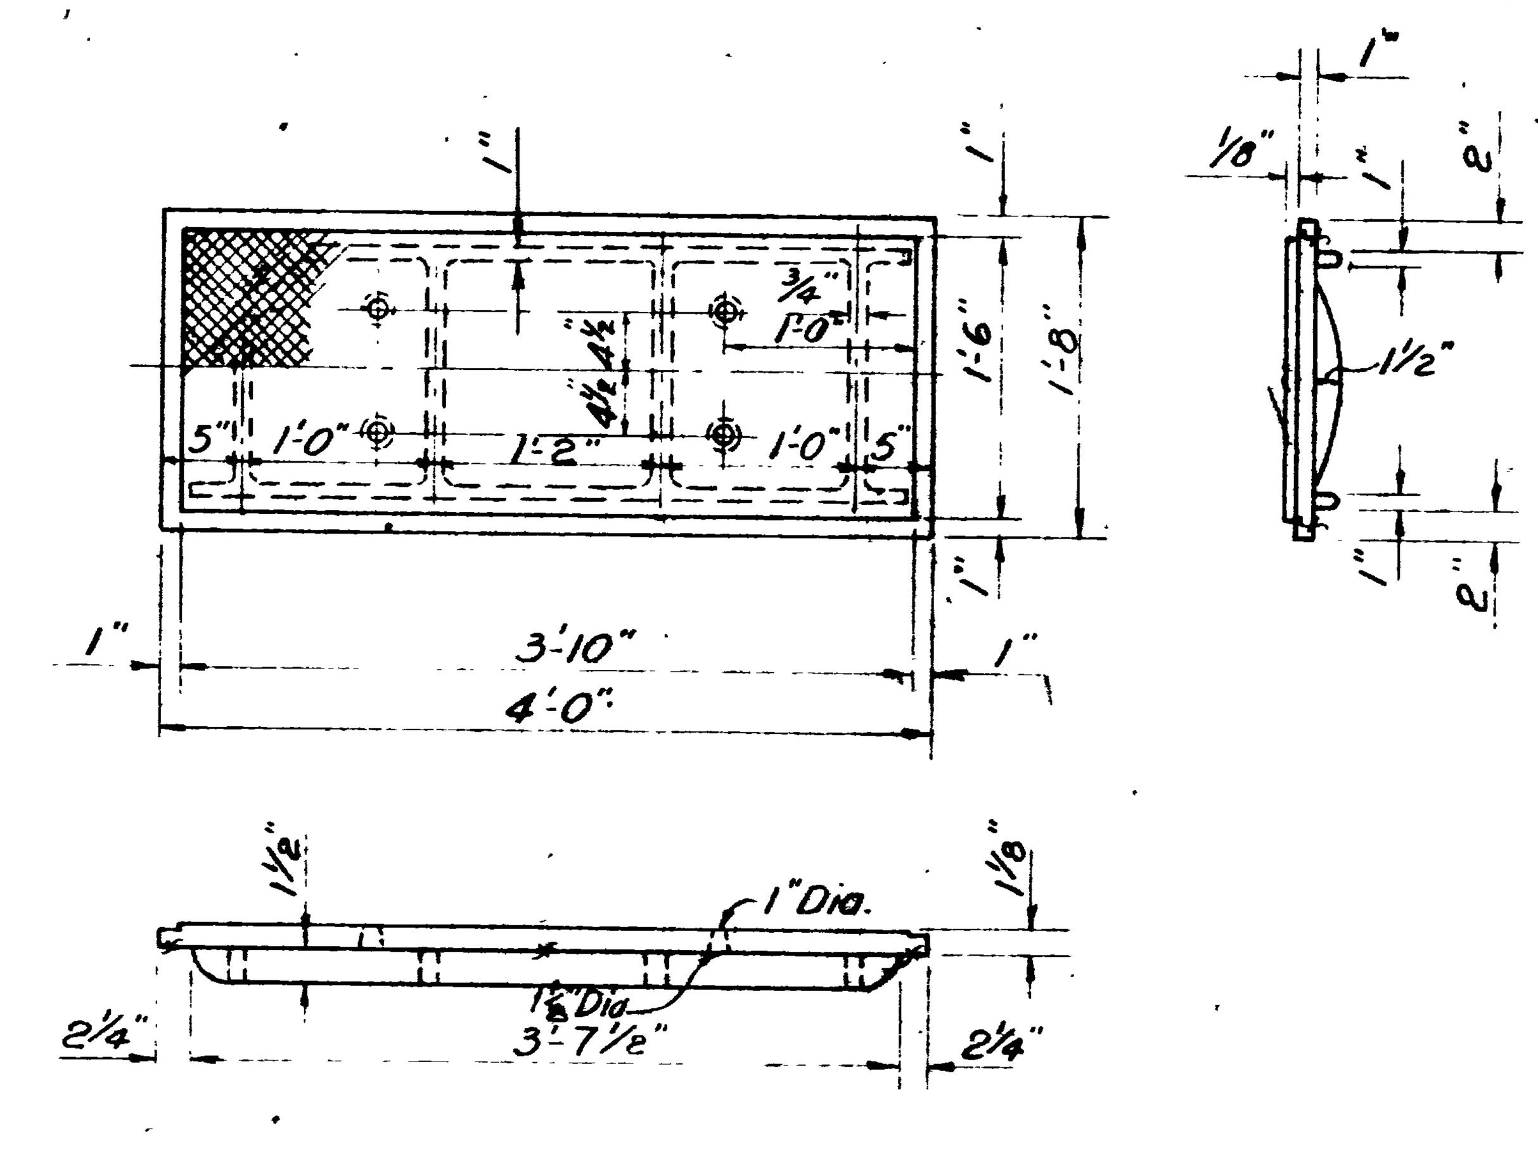
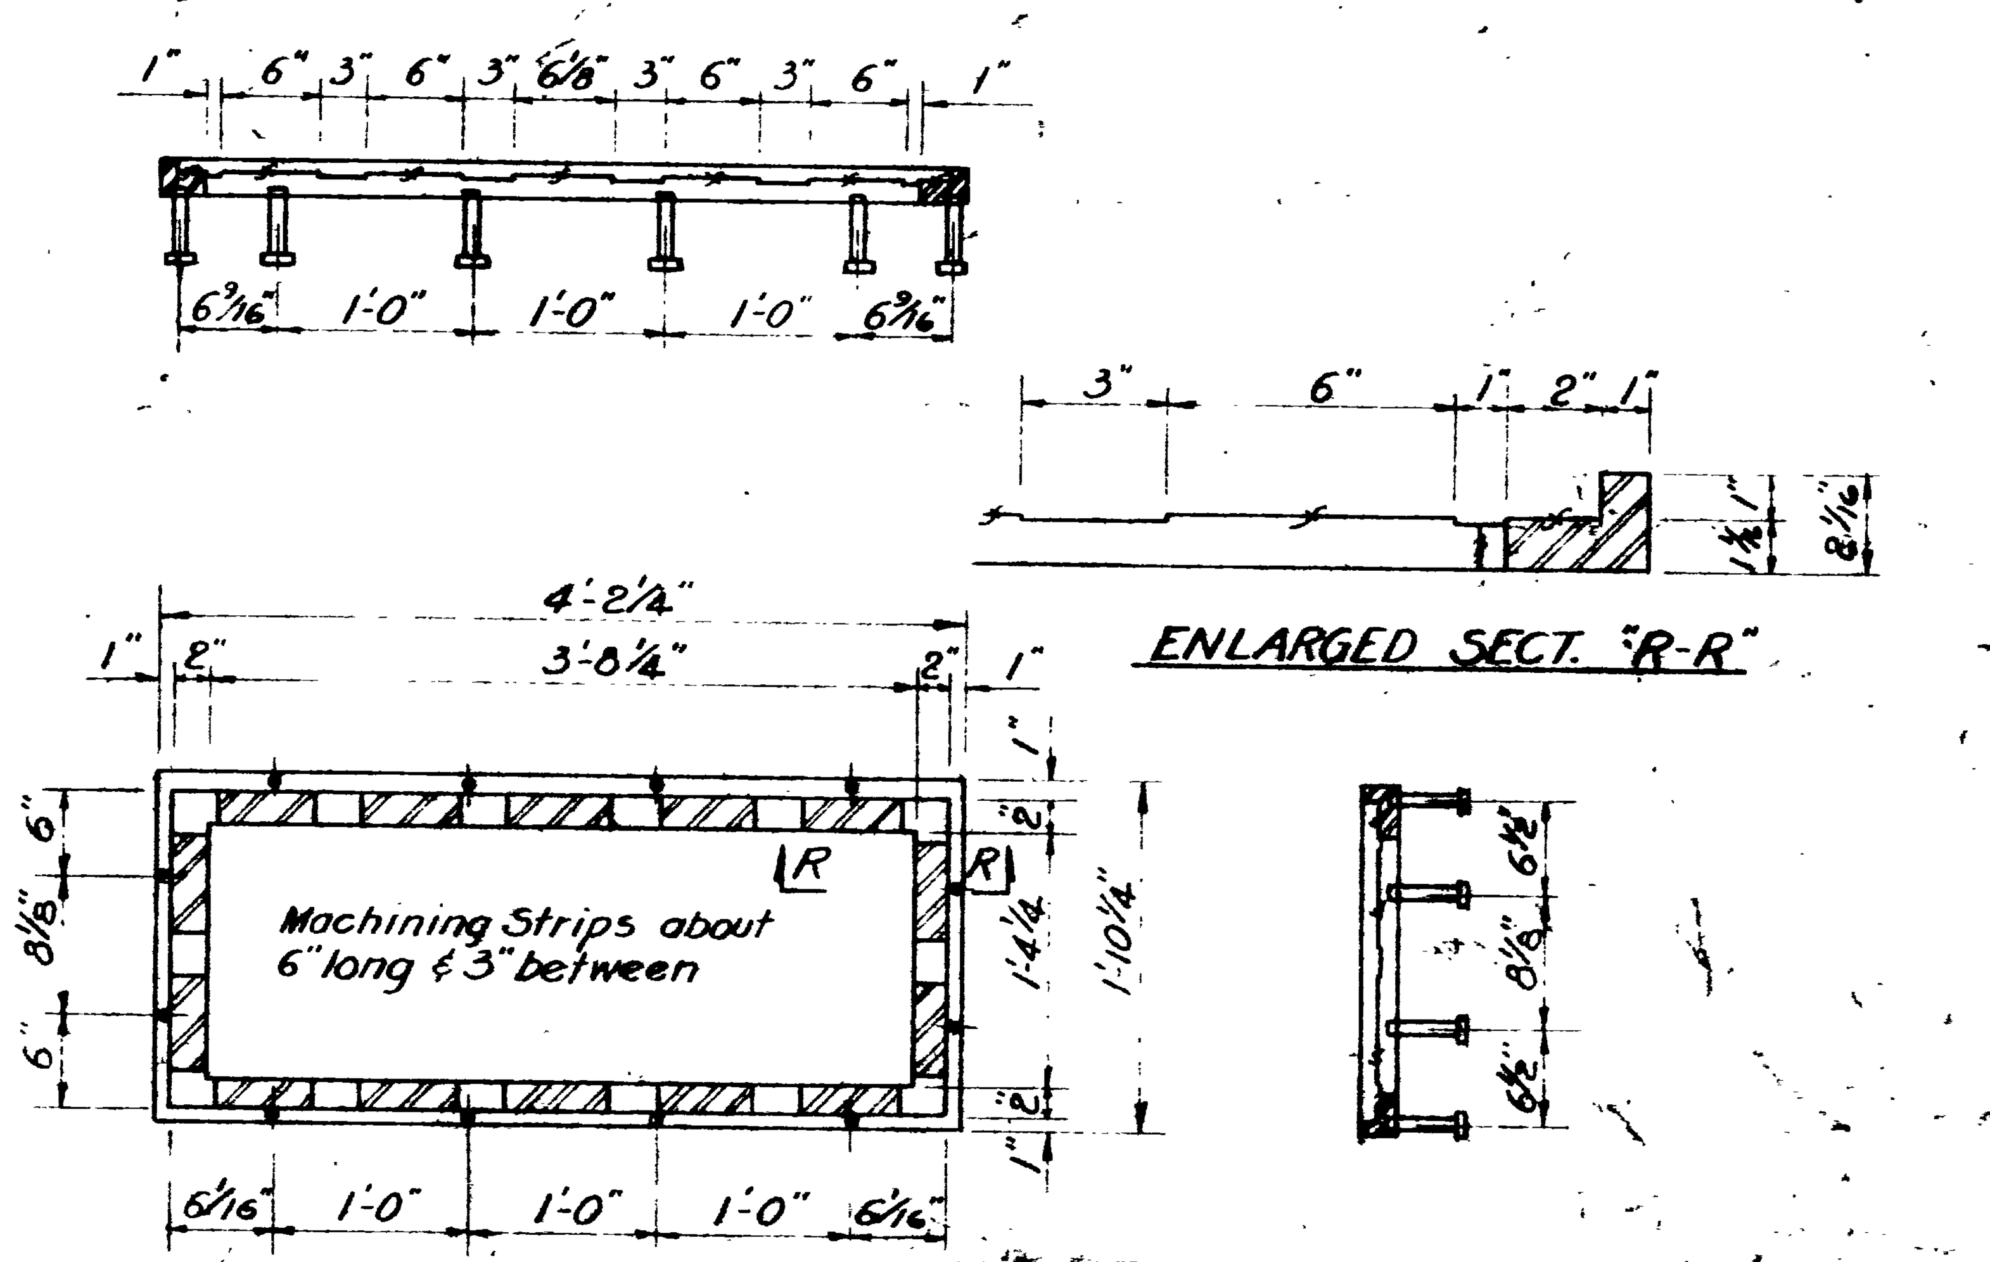
SECTION "B-B"



SECTION "A-A"



CAST IRON COVER
(WEIGHT 320 LBS.)



CAST [illegible]

Note: See "List of Structures" for size and kind of pipe, stations and units required.

GENERAL NOTES

Materials, construction and workmanship shall be in accordance with the State Standard Specifications for Road and Bridge Construction, 1960 edition and supplements thereto which are in effect at date of request for bids.

All reinforcing steel shall be intermediate grade Standard A-305 reinforcing bars.

Unless otherwise shown, all dimensions are [illegible] Out [illegible]. All reinforcing steel shall be #5 bars spaced 12" on centers. Type II cement required. (Low Alkali.) Concrete Class "A".

DESIGN DATA

H 15-44 Loading in accordance with the A.A.S.H.O. Specifications of 1957.
Structural Steel f_s = 18,000 p.s.i. Reinforcing Steel f_s = 20,000 p.s.i.
Concrete f_c = 1200 p.s.i. n = 10

Payment for furnishing and placing Cover Plate and Frame will be paid for as Structural Steel.

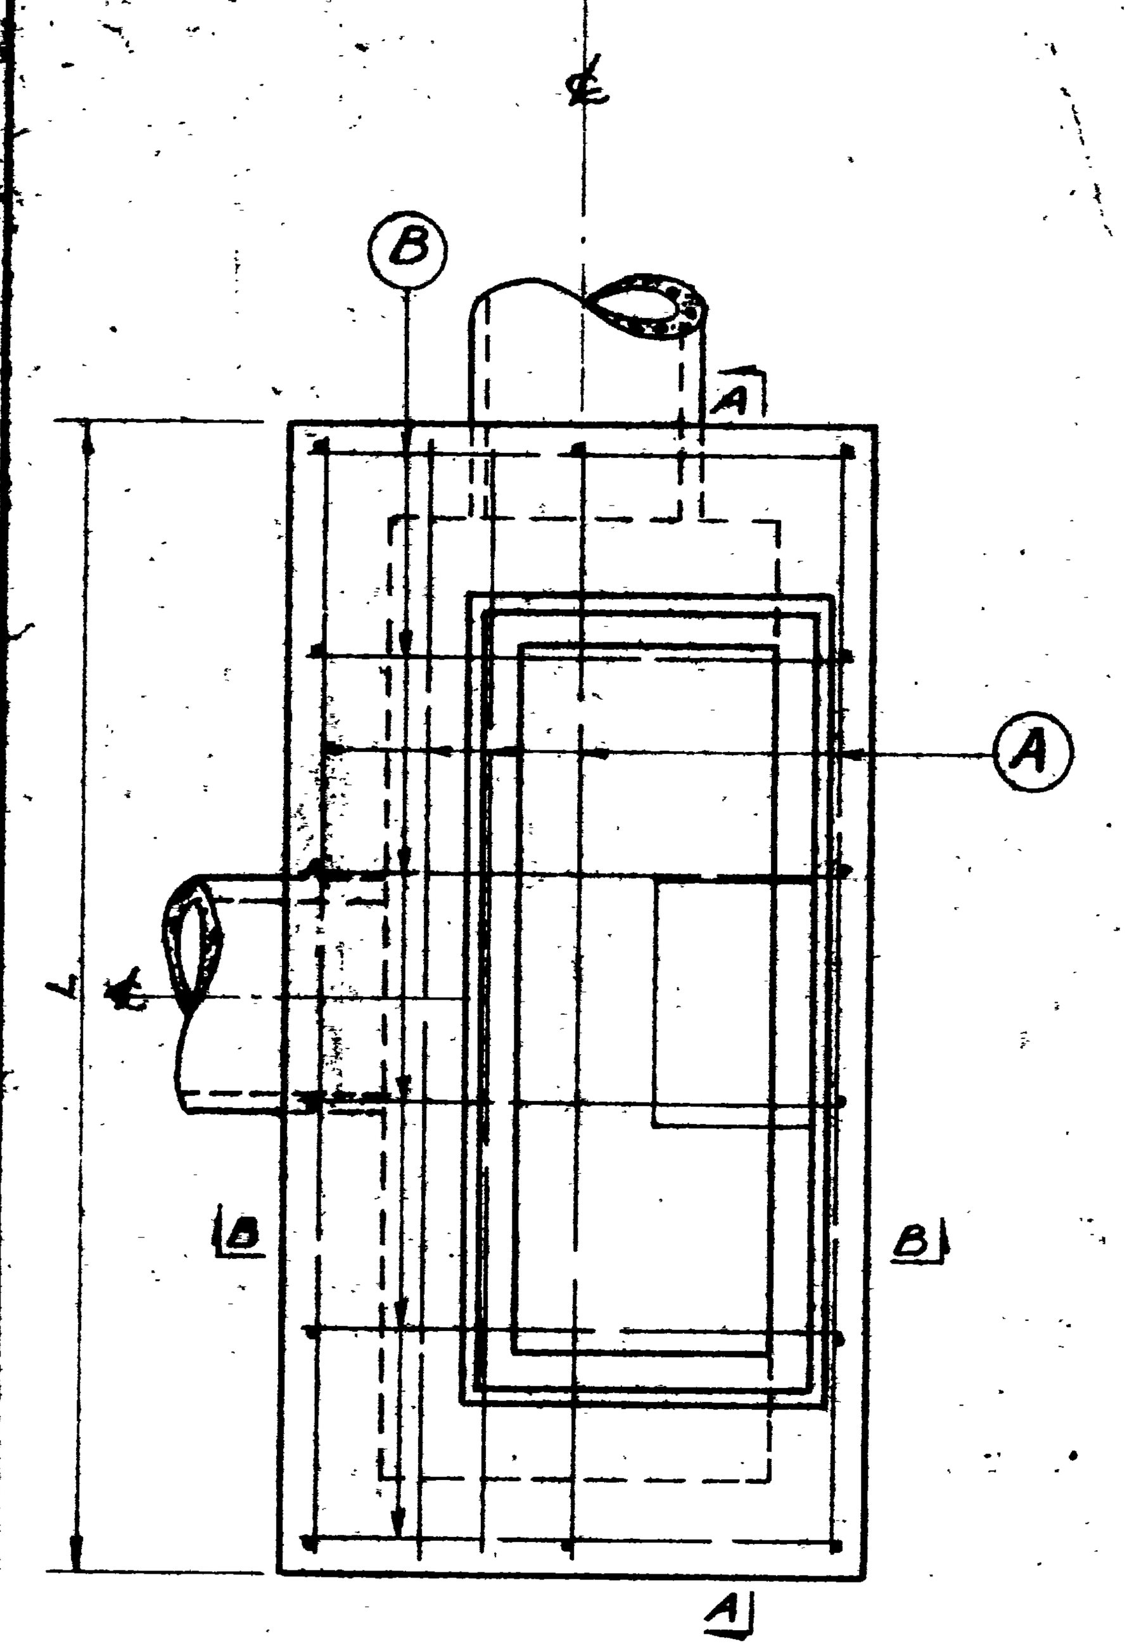
All Structural Steel shall receive one shop coat of Red Paint A.A.S.H.O. Designation M 71-42 or M 72-51; also two field coats of Aluminum Paint A.A.S.H.O. Designation M 69-52.

A Unit shall include one Cast Iron Cover and Frame, and Cleanout Box complete.

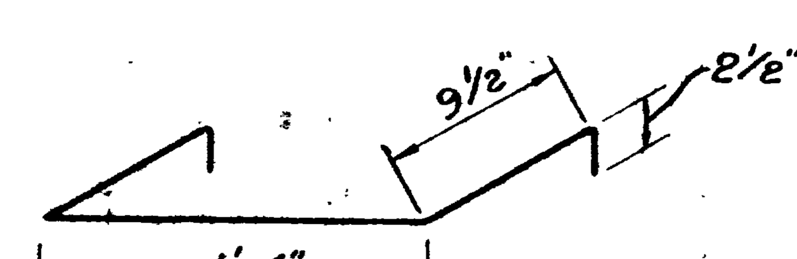
Quantities shown are for one Cleanout Box only. When more than one Unit is required the Quantities are to be multiplied by the number of Units required to obtain the total Quantities.

Excavation for Structures does not include Excavation for Pipe.

Ductile iron will be accepted for either the Cover or Frame Fabrication.



PLAN



LADDER RUNG DETAIL
BAR "D" #6
Length = 3'-4"
Weight each = 5 lbs.

When "H" is 4'-0" or over ladder rungs shall be provided.

FRONT VIEW (CONCRETE PIPE)

NOTE

... CONNECTED TO THE GATE VALVE ... A 12" ROUND STANDARD FLANGED ... BE PROVIDED ON THE DRAIN LINE PIPE TO INSURE THAT THE ... CONNECTION TO THE GATE VALVE IS WATER TIGHT.

GENERAL NOTES

Materials, construction, and workmanship shall be in accordance with the State Standard Specifications for Road and Bridge Construction, 1960 edition, and supplements thereto which are in effect at the date of request for bids.

All reinforcing steel shall be intermediate grade A.A.S.H.O. ... M 31 and deformed per M-137.

Type II cement (low alkali) required.

Place ... fill as far as practical before building ... concrete 14 days before backfilling.

DESIGN DATA

Design in accordance with the A.A.S.H.O. Specifications of 1957.

f_c = 1200 p.s.i.

f_s = 20,000 p.s.i.

n = 10

QUANTITIES

Quantities as shown in schedule are for one headwall only.

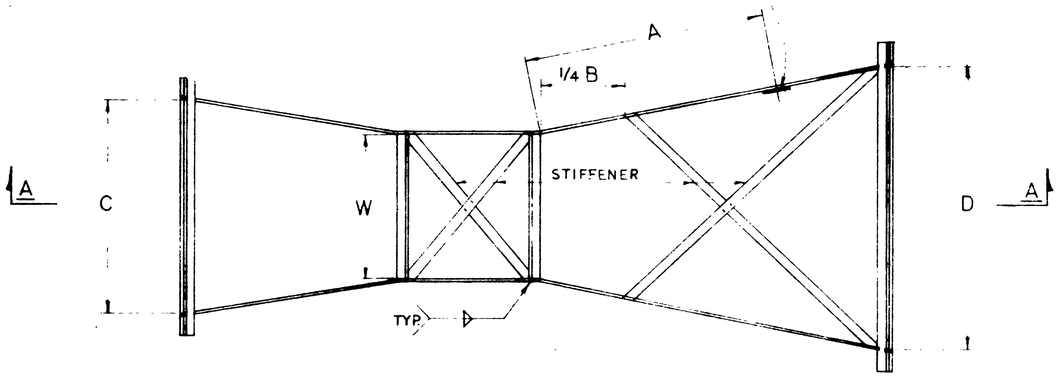
PORCELAIN ENAMEL IRON GAGE LEOPOLD & STEVENS, STYLE "A" OR EQUIVALENT.

SECTION A-A



PLAN

NOTES:
1 - FLOOR AT INLET TO BE LEVEL IN ALL DIRECTIONS.
2 - ALL CONNECTIONS TO BE WELDED.
3 - DIMENSIONS FOR SIZE AND MATERIAL SEE SCHEDULE.
4 - COMMERCIAL PREFABRICATED PARSHALL FLUMES MAY BE USED IN LIEU OF THE ABOVE IF APPROVED BY THE ENGINEER.

NOTES

GAGES TO BE MADE OF NO.18 GAGE (U.S. STANDARD) MILD STEEL PLATE AND TO BE COVERED WITH A VITREOUS ENAMEL WITH A MINIMUM THICKNESS OF 12 MILS ON NUMERAL SIDE & 3 MILS ON THE REVERSE SIDE & ON EDGES WHERE PLATE HAS BEEN CUT, PUNCHED OR DRILLED.

ALL CUTTING AND PUNCHING OF THE PLATES SHALL BE COMPLETED BEFORE THE VITREOUS ENAMEL IS APPLIED.

THE FACE OF THE GAGE SHALL BE WHITE AND ALL NUMERALS AND GRADUATIONS SHALL BE BLACK. GRADUATIONS SHALL BE SHARP AND ACCURATE TO THE DIMENSIONS SHOWN.

THE "L" LENGTH SHALL BE AS GIVEN IN THE SCHEDULE. IN CASE A GREATER LENGTH THAN 4'-0" IS REQUIRED, THE DETAILS SHALL BE SIMILAR TO DETAILS SHOWN FOR SHORTER LENGTHS.

GENERAL NOTES

MATERIALS, CONSTRUCTION AND WORKMANSHIP SHALL BE IN ACCORDANCE WITH THE STATE STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION, 1963 EDITION AND SUPPLEMENTS THERETO WHICH ARE IN EFFECT AT THE DATE OF "REQUEST FOR BIDS".

ALL STRUCTURAL STEEL TO HAVE ONE SHOP COAT OF RED PRIMER.
